Website Designing

Usability Research & Testing

~ **UX / UI / Product Designer** with global brand experience of more than 15 years in the design field and **6 years** of experience as a UX Designer.

Hands on experience in working closely with engineering, product management and customers to understand and establish user requirements. I love designing experiences that are simple, intuitive, and successful.

In almost two decades of putting my learning to practice, I've worked on Web, Desktop and Enterprise focused businesses, managing client projects and teams, communicating with geographically located product management teams and stakeholders using Agile development methodologies. I combine my roots in design with a natural analytical inclination to solve problems and drive products, projects, and teams forward.
